THE INNOVATIVE WHEEL ALIGNMENT SYSTEM

SETUP TO WIN

MODULE EASY | 4.950.-€ VAT not included

INCLUDED

- Setup wheels including vehicle specific adapters
- Support/levelling platform (without corner weight scales)
- Ruler for toe measurement with the customer's own toe string frame

FEATURES

- Easy measurement of toe angle
- Easy measurement of track width
- Setup wheel with adaption area for drop height measurement
- Area to measure camber via camber gauge

BENEFITS

- Access to chassis significantly easier
- Measurement fluctuations caused by tires are prevented
- Unhindered movement of chassis minimises friction to almost zero

MODULE BASIC | 10.950.-€ VAT not included

INCLUDED

- Setup wheels including vehicle specific adapters
- Support/levelling platform (without corner weight scales)
- Measurement of toe angle via laser
- Levelling laser including stand
- CP Ruler device for measurement of track width
- Ride height gauges (spring loaded)

FEATURES

- Measurement of toe angle with laser system
- Easy measurement of track width
- Easy measurement of ride height
- Setup wheel with adaption area for drop height measurement
- Area to measure camber via camber gauge

BENEFITS

- Increased measurement accuracy
- Access to chassis significantly easier
- Unhindered movement of chassis minimises friction to almost zero

MODULE PRO | 19.950.-€ VAT not included

INCLUDED

- Setup wheels including vehicle specific adapters
- Levelling platform with integrated corner weight scales and data processing
- Measurement of toe angle via laser
- Levelling laser including stand
- Ride height gauges (spring loaded)
- Camber sensor (inclinometer), connected to netbook
- Netbook including measuring and data processing software
- Battery charger including rechargeable batteries
- Flightcase
- Positioning system

FEATURES

- Measurement of corner weights on setup wheels
- Measurement of camber with inclinometers mounted on each setup wheel
- Easy measurement of ride height with spring loaded ride height gauges
- Measurement of toe angle with laser system
- Processing and storing of setup measurement data
- Setup wheel with adaption area for drop height measurement
- *Optional:* caster/SAI measurement

BENEFITS

- The most integrated, compact, accurate and fastest system to set up a car with
- Setup time greatly reduced
- Easy measurement of ride height, camber, toe and corner weights
